Jagaramudi, Yaddanapudi Bapatla, Andhra Pradesh, India

PROFESSIONAL SUMMARY

Jun 2023 – Jul 2025

DevOps Engineer with 2+ years of hands-on experience in CI/CD automation, containerization, Kubernetes orchestration, and cloud infrastructure management. Skilled in GitLab CI/CD, Jenkins pipelines, Docker, Kubernetes, Terraform, and Linux administration across AWS, Azure, GCP, and DigitalOcean environments. Proven ability to deploy scalable microservices, implement Infrastructure as Code (IaC), configure monitoring using Prometheus and Grafana, and maintain highly available, secure production systems.

TECHNICAL SKILLS

Version Control: Git, GitHub, GitLab

CI/CD & DevOps: GitLab CI/CD, Jenkins, Azure Pipelines, Pipeline Automation, Build & Release Management

Containerization & Orchestration:

Docker: (Images, Containers, Volumes, Networks, Daemon, Socket),

Kubernetes: (Pods, Deployments, ReplicaSets, StatefulSets, Services, Ingress, DaemonSets, ConfigMaps, Secrets, Namespaces, RBAC, Node Selector, Taints & Tolerations, Affinity, Readiness & Liveness Probes.

Infrastructure as Code: Terraform (Providers, Resources, State, Backend, Data Sources, Modules, Provisioners, Locals, Workspaces, count, for_each, depends_on)

Monitoring & Logging: Prometheus, Grafana, Loki, Node Exporter, Promtail, Alerting, Metrics Analysis

Cloud Platforms: AWS (EC2, S3, VPC, EKS, IAM, Route53, CloudWatch) **Azure** (Resource Groups, VNet, AKS, Blob Storage, Virtual Machines, IAM) **GCP** (GKE, Compute Engine, Cloud Storage, IAM) **DigitalOcean** DOKS

Operating Systems & Databases: Linux (Ubuntu, Nginx), Windows Server (IIS), MySQL, PostgreSQL

PROFESSIONAL EXPERIENCE

DevOps Engineer

ScriptBees IT Pvt Ltd

Jun 2023 – Jul 2025

Key Projects:

Nixa – Auto Deployment Microservice: Implemented gitlab, docker, terraform, and Kubernetes deployments across clouds.

SimplyTrack – Vehicle Tracking Microservice: Managed gitlab docker services, psql database, dns,

StabilityReport – Authentication Microservice: Deployed secure authentication services using Docker and Kubernetes on Windows and Linux environments.

Responsibilities & Achievements:

CI/CD & Automation

- Designed and maintained CI/CD pipelines, Dockerfiles, and images to accelerate deployments and improve overall release efficiency significantly.
- Built optimized Docker images and automated deployments to Kubernetes clusters across EKS, AKS, and DOKS using Vault.
- Troubleshoot pipeline failures, deployment issues, and configuration errors while collaborating closely with development teams to minimize downtime.

Site Reliability Engineering

- Monitored servers using Grafana dashboards integrated with Prometheus and Loki to enhance system performance visibility.
- Proactively tracked CPU, RAM, and storage utilization using Prometheus and Loki metrics to prevent unexpected dev outages.
- Investigated incidents, analyzed logs, and implemented preventive fixes to maintain service stability and ensure HA consistently.
- Managed SSL/TLS certificate monitoring and domain renewals to guarantee uninterrupted secure access across dev env at times.

Cloud & Infrastructure:

Provisioned and managed cloud infrastructure using Terraform across AWS, Azure, and DigitalOcean platforms for scalability.

- Configured networking, IAM roles, compute, and storage services to deliver secure, highly scalable cloud environments reliably consistently.
- Implemented highly available Kubernetes architectures supporting resilient microservices deployments across development environments with improved performance and stability.

EDUCATION

Bachelor of Technology – Mechanical Engineering Graduated: 2021

DECLARATION

I hereby declare that the above information is true to the best of my knowledge.

Moshe Thammuluri.
