PROFESSIONAL SUMMARY

Cloud & Infrastructure Engineer with 2+ years of hands-on experience supporting production environments on Amazon Web Services. Strong in AWS infrastructure management, cloud networking, and monitoring using CloudWatch and CloudTrail. Experienced in handling L1/L2 support, incident management (P1/P2), and troubleshooting issues across compute, storage, and network layers. Skilled

TECHNICAL SKILLS:

Cloud Platform

- *Amazon Web Services: EC2, S3, VPC, IAM, EKS, Lambda (basic), CloudWatch, CloudTrail, Auto Scaling, ALB*
-

Monitoring & Incident Management

- *CloudWatch, CloudTrail*
 - *Prometheus, Grafana (basic exposure)*
-

Infrastructure & Automation

- *Terraform (AWS-focused)*
 - *Basic scripting: Bash*
-

Containers & Platform Support

- *Docker*
 - *Kubernetes (EKS – working exposure)*
-

Operating Systems

- *Linux (Ubuntu)*
 - *Windows Server (basic administration)*
-

Version Control & Deployment Support

- *Git, GitHub*
 - *Basic exposure to deployment workflows (Jenkins / GitLab CI)*
-

Networking

- *VPC, Subnets, Security Groups, NACL*
 - *DNS, Load Balancing, Routing*
-

Databases

- *PostgreSQL, MySQL (basic support)*
-

.

EXPERIENCE

AWS Cloud Engineer (Infrastructure & Automation)

ScriptBees IT Pvt Ltd | Jun 2023 – Jul 2025 Projects:

Cloud Application & Deployment Support

NIXA (Deployment Support Microservice)

- **Supported application deployments using GitLab, Docker, and Kubernetes in cloud environments**

- **Assisted in infrastructure provisioning and configuration using Terraform**
 - **Monitored deployment activities and resolved environment-related issues**
-

SimplyTrack (Vehicle Tracking Application)

- **Managed Docker-based services and PostgreSQL database operations**
 - **Supported DNS configuration and application connectivity troubleshooting**
 - **Assisted in maintaining application availability and resolving production issues**
-

StabilityReport (Authentication Service)

- **Supported deployment of authentication services using Docker and Kubernetes across Linux and Windows environments**
 - **Assisted in troubleshooting deployment and runtime issues**
 - **Ensured system stability and secure access configurations**
-

AWS-Based Application Deployment

Full Stack Cloud Application (Java + AWS)

- **Developed and deployed application on Amazon Web Services (EC2, basic infrastructure setup)**
 - **Configured web servers (Nginx/Apache) for hosting and traffic routing**
 - **Managed database connectivity and application-level authentication**
 - **Assisted in debugging and performance improvements**
-

Deployment & Automation Support

- **Supported build and deployment workflows using GitLab CI/CD and Jenkins**
 - **Assisted in Docker image creation and deployment to AWS ECR**
 - **Participated in environment-based deployments (Dev, QA, Production)**
 - **Helped reduce manual efforts through basic automation and scripting**
-

Container & Platform Support

- **Containerized applications using Docker and**

supported deployments on Kubernetes (EKS – exposure)

- **Assisted in managing Kubernetes resources such as Pods, Deployments, and Services**
 - **Supported configuration management using ConfigMaps and Secrets**
 - **Monitored application health and handled basic troubleshooting**
-

Monitoring & Incident Support

- **Monitored systems using Prometheus, Grafana, and CloudWatch (basic exposure)**
 - **Analyzed system metrics (CPU, memory, network) to identify issues**
 - **Supported alert handling and incident resolution**
 - **Assisted in maintaining system uptime and SLA adherence**
-

EDUCATION

Bachelor of Technology (Mechanical Engineering) Sri Chundi Ranganayakulu Engineering College | 2021
